

Ideation Phase – Brainstorm&Idea Prioritization

Project: PocketSmartAI

Field	Content
Date	01 October 2026
Team ID	[SWTID-2026-2606
Project Name	PocketSmartAI
Maximum Marks	4 Marks

Step 1: Team Gathering, Collaboration and Select the Problem Statement

Selected Problem Area

Budget-conscious users face difficulty in planning purchases and events because they have many choices but limited budgets, making it difficult to decide what to choose, how much to allocate, and how to stay within their budget.

Selected Problem Statement

Users need a simple way to create budget-aware plans and receive suitable recommendations based on their budget, requirements, preferences and occasion.

Step 2: Brainstorm, Idea Listing and Grouping

Group 1 — Budget Planning

- Personal Budget Planner
- Home Interior Budget Planner
- Party Budget Planner
- Jewelry Budget Planner
- Budget allocation calculator

Group 2 — AI Recommendations

- AI-based product recommendations
- Personalized recommendations based on user preferences
- AI-generated budget plans
- Recommendation tips
- AI-assisted decision making

Group 3 — Personalized Planning

- Occasion-based recommendations
- Style-based recommendations
- Requirement-based recommendations
- Outfit-image-based jewelry suggestions

- Guest-based party planning

Group 4 — Shopping / Service Discovery

- Product search links
- Links to multiple online platforms
- Category-based recommendations
- Estimated product/service costs
- Compare options before purchasing

Group 5 — User Account&History

- User registration and login
- Save previous recommendations
- View recommendation history
- Personal dashboard
- Logout/session management

Step 3: Idea Prioritization

Idea	Importance	Feasibility	Priority Area
AI-powered budget recommendations	High	High	High
Budget-aware planning	High	High	High
Home Interior Planner	High	High	High
Party Budget Planner	High	High	High
Jewelry Planner	High	Medium	High
Recommendation History	Medium	High	Medium
User Login&Dashboard	Medium	High	Medium
Product/service search links	Medium	High	Medium
Outfit-image support	Medium	Medium	Medium
Live retailer price/stock integration	Medium	Low	Lower

Importance–Feasibility Matrix Placement

- High Importance + High Feasibility: AI budget recommendations; Budget-aware planning; Home Interior Planner; Party Planner.
- High Importance + Medium Feasibility: Jewelry Planner; Personalized recommendations; Outfit-image analysis.
- Medium Importance + High Feasibility: User login; Recommendation history; Search links.
- Lower Feasibility: Live retailer inventory; Live retailer pricing; Direct purchasing integration.

Final Selected Idea

PocketSmartAI

An AI-powered budget planning and recommendation application that helps users create practical plans for home interiors, parties and jewelry based on their budget, requirements and preferences.

The current implementation supports the three planning modules, Gemini-assisted recommendations when configured, a local fallback catalog, account management and recommendation history. Retailer links are search links rather than claims of live stock or live prices.
