

Ideation Phase – Define the Problem Statements

Project: PocketSmartAI

Field	Content
Date	01 October 2026
Team ID	SWTID-2026-2606
Project Name	PocketSmartAI
Maximum Marks	2 Marks

The following problem statements follow the faculty template: Problem Statement | I am (Customer) | I'm trying to | But | Because | Which makes me feel.

Problem Statement	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A person planning a home interior within a fixed budget	Select suitable furniture, lighting, fans and decor while staying within my budget	I have many choices and find it difficult to decide how to allocate my budget	Different products have different prices and requirements	Confused about what to choose and how much to spend
PS-2	A person planning a party or event with a fixed budget	Plan catering, venue, decoration and entertainment according to my budget	It is difficult to estimate and distribute the budget among different event requirements	The number of guests, event type and required services affect the overall cost	Worried about exceeding my planned budget
PS-3	A person looking for jewelry for a particular occasion	Find jewelry that matches my budget, occasion, style and preferences	There are many designs and choices, making it difficult to select suitable options	Jewelry choices depend on occasion, style, preferences and sometimes outfit appearance	Unsure about which jewelry option will be suitable

Connection to PocketSmartAI

These three problem statements lead to the project's three implemented planning areas: Home Interior, Party and Jewelry. Together, they support the overall problem of making budget-aware, preference-based planning simpler for users.
